

SAFE PASTEURIZED DONOR HUMAN MILK

Mothers' Milk Bank of Tennessee is making safe donor human milk more accessible with our new Outpatient Program. The new program allows us to serve families with medically fragile infants at home or infants in need of donor milk while mom's own milk is insufficient or not available.

How to Request Donor Milk

Please visit milkbanktn.org/outpatient or scan the QR code below to submit a request form. Please allow two business days for our team to review your submission

A processing fee will be assessed to cover a portion of the significant costs required for donor screening, nutritional analysis, pasteurization, microbiological testing and storage. For families in need of financial assistance, Mothers' Milk Bank of Tennessee has established a Compassionate Care Fund thanks to the support of our financial donors.

You may schedule a pick-up Monday- Friday at 2909 Old Fort Parkway, Suite 105, Murfreesboro, TN 37128 or the milk can be shipped to you with dry ice next-day via UPS. Please note, shipping rates do apply. Visit our website to learn more.
